Coronavirus (COVID-19) Briefing

Dear Exhibitors and Visitors,

All exhibitions planned for 2020 will be held on their current dates unless otherwise recommended by the Turkish Republic official authorities. We would like to point out that the health and well-being of our exhibitors, visitors, employees, and all our business partners are always our top priority.

As ReedTüyap Fairs, we are following the instructions from the World Health Organization (WHO) and the Republic of Turkey Ministry of Health as it relates to travel and health. We advise our exhibitors and visitors to take their precautions in line with the guidelines described.

We are working with the authorities and our venues to put in place measures and will follow up as the situation as it evolves. As of today, these measures include:

- Enhanced cleaning and sanitisation across all public areas and customer touchpoints in the venue eg. doorknobs, batteries, handrails, toilets, and sinks. Disinfectants and sterilization materials for general use will be provided.
- Enhanced personal protection awareness training to all staff. i.e. personal hygiene, frequency of use of sanitation/disinfection products, etc...
- We are installing hygiene stations for your use in public areas.

Unless there is an opposite decision regarding the travel disability by Turkish officials, we will host our exhibitors and visitors who want to attend / visit our fairs and are not affected by the travel restriction at our fairs.

As ReedTüyap Fairs, we closely follow the developments on the subject.

We will be sharing our current action plan in line with the developments.

For more information, please follow the updates from local or national authorities on <https://www.who.int/> and <https://www.saglik.gov.tr/>

With our best regards,
